

BECAUSE OF YOU... UNACCEPTABLE

[The Inhabitants of the Earth Agora](#) - September 29, 2022 -

This week we are starting an action to denounce at a global scale irresponsibility, guiltiness and punishability of the main global financial actors and the highest political leaders (heads of states and governments) of the world's 20 wealthiest countries.

These two groups will receive a specific public letter. For a month, we will send a copy of these letters to hundreds and thousands of people, organization and movements and we will also ask them to send directly a copy of these letters to the 35 recipients. As for [the 15 financial actors](#) we have already identified the leaders of the 2 private companies which are dealing with Chicago stock Exchange (which introduced water transactions on the derived products stock market in 2020 considering water as financial assets) and the New York stock Exchange (which decided in 2021 to give the management of 30% of the natural world to private trading companies -Natural Assets Corporations- considering natural elements as financial assets); the 3 world's biggest and most powerful private investment funds (BlackRock, Vanguard and State Street which are managing more than 22,000 billion dollars that is to say more than United States' gross domestic product in 2021 or 4 times more than Italy's); and finally the world's biggest banks' heads : 4 from China, 2 from the US, 2 from France, 1 from the UK and 1 from Japan. In regard to the 20 heads of states and governments we are limited to [the 20 first countries](#) in terms of gross domestic products which represents the wealth produced in 2021. This list is mentioning all the countries with the world's most powerful economy. It starts with the US and China and ends with Turkey and Switzerland.

So, what do we write to these powerful people ? We want to convey that this is the right and duty of all the inhabitants of the Earth to denounce how unacceptably they behave: the leaders – the people who have the power in their own country and together at a global scale to make decisions about the future of the world and humanity - are still making war in Ukraine and 20 other places on Earth and they are threatening to start a nuclear war while maintaining 3, 6 billion people without any health cover and 4, 4 billion people without any social care.

Let's tell them they are acting like criminals (and not only like fools) by continuing to destroy life on the planet even though they are aware of it (ecocide). Climate catastrophe, destruction of the biodiversity in forests and soils, dry up and contamination of rivers and lakes, pollution of oceans and air, impoverishment of billion people and unacceptable social inequalities are

appearing as the results of their own choice and not nature's or bad luck's. They could have avoid it all but they didn't want to.

They are sowing destruction and death while talking about adaptation and resilience. They are laughing at words like 'transition'- which appears as a bold word regarding this dramatic situation. They are comforting themselves by attending to never-ending world summits and spitting useless words pretending to change a thing or two from the laws they established before and that were all as the same.

Our denunciation aims to tell the leaders that they are directly and personally responsible and guilty and that it is not true nor enough that we all have to change our actions individually or together to save the planet and try to build a social justice. Taking such shortcuts is too easy. They have to cease being lords and masters of the world, to dominate and impose their dangerous choice while defending their own interest in power and wealth. That is why we entitled this press release 'Because of you...unacceptable'.

Furthermore, our goal is to share fundamental principles of democracy and justice system, considering that all the citizens have the right to protest the dominant power that discriminates, excludes and destroys essential common goods and does not respect universal rights and even kills them. And this is apparently the case with the current system. So we invite all the Earth inhabitants to stand up to fight and liberate humanity and life on Earth :

- a. From global finance dominance which is monopolizing all the goods including knowledge and technology (e.g. patent on living and artificial intelligence) and destroying life whereas life is not a price that lies on trading
- b. And from subjection of political public power to interest in companies and industrial, commercial, technocrat and financial private groups. It is urgent to regenerate the dimension, the public environment, the idea of 'us', and invent- or reinvent- politic at local and global scale, the politic of life for peace, freedom, and justice.

Leaders think they can buy it all with money and conquer it all with weapons. They are wrong. This is a basic mistake.
