RESPONSIBLE?

YES, since you have knowingly appropriated the natural world of the Earth to manage it on the stock market through the Natural Assets Corporations, and speculatively quote the price of water, source of life for all, considering it a financial product source of profit for a few.

YES, to organise the world's most deadly economic piracy ever: reducing solar energy, forests, oceans, mountains, seeds, microbes, the human body, knowledge... to commodities, even financial products.

GUILTY?

YES, to deny the right to LIFE to billions of human beings who are dying in the name of growth, competitiveness, financial return dictated by your oligarchies, and your global economic wars for the monopolization of resources.

UNPUNISHABLE?

NO. You think that money allows you to do everything, but the billions of hungry, thirsty, sick, children, women and men without sanitary coverage, without housing, and who are expelled from their lands by the millions by wars (in progress!) as well as by the devastation of the environment, condemn your banks, your investment funds, your global agribusiness, mining, pharmaceutical, computer and commercial groups, dedicated to your logic of power and domination.
